ONIX

Onix is one of the leader glass mosaic companies' worldwide thanks to its dynamic, creative and, mostly, advanced philosophy. Based in an ultramodern aesthetic, this philosophy makes to the top all those interior designers and architects that commit to use Onix products. Statistically, Onix is the company with the highest turnover growth rate of the past years. The design of its offer has become a referent for the most innovative interior designers of today's market. After a decade of innovation and modernity, Onix has acquired its own hallmark that excels among the other industry leading companies. Each Onix product is a reflection of the energy that arises from this ultramodern company.

Today, the use of glass mosaic goes far beyond swimming pool covering. Interior decoration has redefined its limits and pre-established concepts, thanks to the introduction of glass mosaic as a new decorative element.

Onix had the vision to find out the endless aesthetic possibilities of glass mosaic in the creation of new atmospheres. As light touches the high quality textures of Onix products, there is a new combination of effects that create the most unique and futurist atmospheres one can think of, while keeping the necessary balance between aesthetics and practicality.

The Onix offer is addressed to modern professionals searching for unique materials capable of harmoniously merge with all the other elements of their projects and creations.

The Onix spirit has lead the projects of many homes, public institutions and commercial malls worldwide. It is a spirit that invites today to live tomorrow's future by choosing one of the many versatile collections offered by this international firm. The glass mosaic of the future has a name: Onix.

ONIX ESSENCE

Onix spirit is living the future today. At Onix, everything is filled with this vocational character that makes it unique and different from the rest.

Its nature has been built after a decade of innovation and audacity that have put this international company in the vanguard of glass mosaic. Design, production, sales, distribution... Each part of the Onix mosaic is attached to the other by means of a common philosophy that fills them all with a unique hallmark reflecting the futurist values of the brand.

Always in search of innovation, Onix was the first company to introduce the silk screen printing in the mosaic decoration, and also the first to offer to interior designers and architects this new creative solution that has since then totally changed the concept of decoration with glass mosaic.

Onix broke with all the traditions when introducing new tile sizes, thus enriching glass mosaic with more aesthetic solutions. Tiles of 1,2 x 1,2 cm, 2,5 x 5 (Trabado), 5 x 5 cm. (Penta), and 2,3 x 2,3 cm. y 2 x 2 cm. have considerably incremented the choice of creative solutions for the design of amazing and unique atmospheres.

The constant evolution of the way glass mosaic is used for design is just a sample of Onix open-minded and business-oriented philosophy. It reflects, all in all, the futurist spirit of Onix.

ONIX PRODUCTION

At Onix, we feel responsible for the world that future generations will inherit. Therefore we are committed to the environment.

Onix glass mosaic tiles are made of recycled glass, as stated in the Green Product label attached to them. This is a certification granted by the American auditing firm Scientific Certification System (SCS), one of the international leading certification firms for environmental protection and social responsibility and quality in both public and private industries.

This environmental award is an added value to the futurism and high quality design of the items that make up the fourteen collections of the Onix offer.

The rich variety of existing series is an invitation to make endless combinations between them, so as to create shading blend effects or artistic finish or friezes thanks to a wide range of textures, colors and shapes. Onix collections' versatility converts its products into the ideal solution for designing and personalizing spaces.

Aiming at making the installation of glass mosaic as easy as possible, Onix offers three reliable and lasting supports for its products: paper sheets, fiberglass mesh and PVC. All of them allow a perfect adjustment to any kind of external or internal surface, thus ensuring a perfect finish.

Among all its exclusive products, Onix last piece of work is especially remarkable: the Onix Collection, a glamorous allegory for architects and interior designers.

It is an exclusive collection made of seven different and ultramodern series: Iridium Glass, Ice Glass, Crytal Glass, Classy Glass, Glam Glass, Geo Glass and Moon Glass. The specific characteristics of each of these stunning, captivating and exceptional series offer elegant, functional and futurist solutions for the new challenges of habitat design.

Moon Glass is the future today. Its micro reliefs, resulting from merging different metallic effects, reflect the double aspect of today's decoration trends that trust iridescence to provide atmospheres with dynamism and fluidity.

Moon Glass blends together the audacity of innovation with the simplicity of elegance, the necessary elements to create balanced spaces that escape from over elaborated baroque style or from the emptiness effect of minimalism.

Moon Glass 2,5 x 2,5 cm tiles are extremely versatile, as they are perfectly suitable for floors and walls without being specifically non-slippery. Functionality and beauty are the most harmonious values of this Onix last creation.

Iridium Glass is a fascinating series. Admired by all, it is made of iridescent glass pieces with gold reflections. This exclusive series comes in pieces of 2,3 x 2,3 cm., thus breaking away from past established traditions. Iridium Glass is offered in five different colors: red, white, black, blue and green. There is a sixth color, chrome, created to serve as a complement to the others, as it endows them with a metallic effect that reflects futurist and innovative atmospheres.

Ice Glass redefines the limits of glass mosaic. Its appealing distressed aspect is offered in six different tones: light blue, dark blue, green, beige, black and white. Ice Glass pieces shine with multiple reflections enlarging and withdrawing the space, and also allowing the interior designer to play with the light so as to redefine the physical limits with the only help of imagination. In fact this series' pieces do not have any limits either, as they have irregular shapes thus filling with life each tile of 2,5 x 2,5 cm.

Crystal Glass plays with the light thanks to its small transparent pieces that have a light touch of color. Its 2,3 x 2,3 cm. pieces have a huge chromatic variety, as its twelve colors offer eight amazing combinations. White pieces (two shades), beige pieces (two shades), red, orange and blue pieces (three shades) and green pieces (two shades) create a unique palette of colors to paint, together with the light, unique and modern spaces.

Classy Glass is the most distinguished series of the Onix Collection. It has 26 different references, a size of 2 x 2 cm, and its main feature is the golden vein that reflects glamour and elegance.

Glam Glass is a real sparkle of stars. It gets back the gentleness of the stone to obtain a unique brightness. Glam Glass pieces re-invent the power of the light effect by means of combining smoked and iridescent sensations. This series is offered in eight colors that shine according to the lighting.

Geo Glass is the multiform series of the Onix Collection. Going beyond the traditional square glass mosaic, Geo Glass' pieces are offered in rectangular shapes of 20 x 42 mm (Geo Glass Brick), oval shapes of 25 x 50 mm (Geo Glass Oval), round shapes with a radius of 20 mm (Geo Glass Circle) and square shapes of 20 x 20 mm (Geo Glass Square). These are the shapes of the future, now available to interior designers and architects so as to captivate us with the clear reflection of their colors. The combination of white, black, red,

brown and blue creates a chromatic symphony that captivates whoever looks at it. In Geo Glass, sparkle dances free under the rhythm of shapes and colors.

Designers who dream with malleable spaces are strongly attracted to these series, as they allow them to express all their creativity and transform every wall into a white canvas, every column into a rock to be sculpted, and every façade into a museum for exhibitions.

Onix Collection allows interior designers and architects to bring to life all those ideas and projects they have imagined while anticipating the future.

ONIX PEOPLE

Onix materials and products allow interior designers to express their boundless creativity. With Onix there are no impossible limits for design, there are only real and advanced solutions. Choosing Onix means designing the future.

Aware of the decorative possibilities of glass mosaic, Onix has involved itself in international projects addressed to strengthen the links with professional architects and interior designers.

The Onix Project Department serves to this purpose, as it supervises and advises its clients with respect to the endless possibilities of Onix collections.

The interaction between Onix and its public is one of the main features of the company, which goes far beyond merely producing tiles, as it gets fully involved in the process of installing them. Searching for constant improvement, Onix has created specific communication channels for the bidirectional exchange of information resulting from the use of its glass mosaic.

Its last generation web site is Onix most important meeting point with the clients. It is a platform for launching every new features produced by Onix innovative spirit, while it makes the acquisition and distribution process with the clients more easy and dynamic.

ONIX PROJECTION

Onix projection goes beyond all mental and physical limits. The international market is the final destination for half of the company's glass mosaic production, whose futurist designs can be perfectly understood by interior designers of different and far away countries like the United States, Saudi Arabia or Russia. Onix proposals have fascinated all those who have seen them on the occasion of the different ceramic fairs that take place worldwide during the year.

Onix singular mosaics have a consolidated reputation in Europe, as reflected by the sales figure for the Old Continent. Both at the International Fair for Architectural and Bathroom Decoration Ceramic of Bologna, Cersaie, and at the International Fair for the Construction Industry Ceramic Covering of Valencia, Cevisama, Onix exhibition stands have been widely praised for their audacity and originality.

Furthermore, Onix participated in the London 100 % Design Fair. The company could not miss the most important British exhibition of contemporary design, a fair that defines the trends in furniture, lightning, accessories, wall and floor covering, textile products, kitchens and bathrooms.

Onix has also implemented its futurist spirit in the highly demanding American market, by bringing its modernist and imaginative stands to Coverings, the ceramic fair of Orlando (United States).

Onix has also attended Casa Décor Miami and Casa Décor Barcelona. Moreover, the company's promotion in the United States has been reinforced by attending the Pool & Spa Expo at Las Vegas.

Today, Onix exports its futurist, ultramodern and innovative spirit to the rest of the world. For Onix there are no boundaries to innovation and design.
